To Whom It May Concern:

I had Home Window Tinting & Commercial, tint six of my windows, in 1995. I just replaced 22 windows on the east side of my house, due to seal failure. These had no window film on them.

The six windows on the west side of my house, which were tinted, had no window failure. This just proves, once again, that window film does not cause seal failure.

Sincerely,

A handwritten signature in cursive script that reads "Shari Short".
